Dear Xtreme Cables/Xtreme AV Customer & Fellow Audiophile,

In this newsletter... I wanted to update you regarding some **exciting new product developments** at Xtreme AV. We are especially eXcited about our **NEW patent pending Xionic Tourmo Gun™... an affordable Tourmaline negative ion treatment accessory optimized for BOTH optical discs (CDs, SACDs, DVDs, Blu-Rays, DVD-Rs and CD-Rs) AND vinyl LPs.**

Our new **XionicTG CD/LP** quite simply makes the digital presentation much more realistic, analog and palpable... improving the musicality of digital playback. And improvements in video performance are also impressive!!! **Digital has NEVER sounded so analog... and analog gets EVEN BETTER!!!**

Our Xtreme AV Xionic Tourmo Gun™ is GUARANTEED to help you "Experience the Emotion in Music"!!!

A little background about our patent pending Xionic Tourmo Gun™ invention...

I have always been a strong believer in Tourmaline-based Negative Ion treatment for optical discs... as the Japanese **Acoustic Revive RIO-5** Tourmaline based Negative Ion Generator convinced me that **this was definitely a WOW "must have" product** for CD, SACD, DVD-A or Blu-Ray playback. You see that optical discs take on musicality robbing charges when played... or simply when resting in their charged plastic jewel cases. As a dealer for the RIO-5... I have sold many of them... with universal customer acceptance and agreement **that the RIO-5 was truly a WOW "must have" product!!!**

At the RMAF... I had the pleasure of having local LA/OC Audio Society President and Positive Feedback reviewer Bob Levi stop by and evaluate my table top headphone setup.. and he was so impressed with the RIO-5 that he purchased one. I shipped him one when I got home... and in 3 days he wrote this eXceptional **Positive Feedback RIO-5 Review** ... as he was equally eXcited about his experience. But the **RIO-5's relatively expensive price tag of \$595.00 got me thinking... as I wanted all audiophiles to experience the dramatic improvement in digital playback that Tourmaline Negative Ion treatment could provide.**

So I started thinking and inventing... with THREE design objectives in mind.

1. Offer an **AFFORDABLE** cost effective alternative to the Acoustic Revive RIO-5.
2. Offer a Negative Ion treatment device that performs equal to or **BETTER** than the RIO-5.
3. Offer a device that can not only treat all Optical Discs... but also **treat LPs and audio cables.**

Our extensive R&D efforts and passion for musical eXcellence paid off... and we nailed it!!! We are now pleased to offer you our Xtreme AV Xionic Tourmo Gun™ CD/LP... a product that has SURPASSED all of our design goals!!!

We are so confident that you will "**Experience the Emotion in Music**" to an appreciably greater degree **that our XionicTG is GUARANTEED to PERFORM... and comes with a 30-Day money back GUARANTEE!!!**

Xionic Tourmo Gun™ Benefits...

Audio Benefits on CD, SACD, DVD-A, DVD and Blu-Ray Optical Discs...

- Dramatic Improvement in Naturalness and Musicality
- Improved Micro-detail Resolution
- Improved "Air" and Image Separation
- Improved Soundstage Depth and Front to Back Image Layering
- An Improved 3-Dimensional Holographic Presentation
- Improved Bass Extension and Control
- A Lower Noise Floor
- Analog-like Presentation Qualities

Overall... a DRAMATIC improvement in naturalness and musicality... allowing you to be more connected to the presentation and "Experience the Emotion in Music"!!!

Digital has NEVER sounded so analog... and analog gets EVEN BETTER!!!

Audio Benefits on LPs...

- Improvements in Clarity and Detail
 - Improved Bass Extension and Control
 - A Lower Noise Floor with Less "Clicks and Pops"
 - Improved Micro-detail Resolution
 - Improved "Air" and Image Separation
 - Improved Soundstage Depth and Front to Back Image Layering
 - An Improved 3-Dimensional Holographic Presentation
-

Video Benefits on DVDs & Blu-Ray Discs...

- All the Dramatic Improvements in Audio Naturalness and Musicality that one experiences on Audio Optical Discs
- Improved Video Resolution
- Improved Color Vibrancy
- Improved Contrast
- Improved 3-Dimensional Holographic Video Images and Image Layering

Overall... a DRAMATIC improvement in picture and audio qualities... taking your Video/Home Theater System's sense of "realism" to the next level!!!

Our Second Exciting NEW Product!!!

Xtreme AV X-Demag™ CD/LP Demagnetizer

Xtreme AV's **NEW X-Demag™ CD/LP Demagnetizer**... a top quality Video/Audio Bulk Tape Eraser made by the Geneva Group... produces a **super strong 2,300 gauss field for complete demagnetization of all Optical Discs and LPs**. Benefits include a clearer musical presentation having a lower noise floor... with improved naturalness and image separation. Includes 5 - paper CD sleeves to be used for the CD/DVD/Blu-Ray demag treatment. **A BEST VALUE AT ONLY \$110.00!!!**

I find that on CDs... the X-Demag competes eXceptionally well against my reference Acoustic Revive RD-3 Demagnetizer when used properly (IMO... it does a better job)!!! To achieve complete disc demagnetization... the technique is simple... as all one needs to do is insert the CD/DVD/Blu-Ray into the supplied paper sleeves... and first run it over the label side for about 20 - 25 seconds. Then repeat for the read side.

Our Third Exciting NEW Product!!!

NEW & IMPROVED!!!

Liquid Resolution™ CD/SACD/DVD/Blu-Ray Enhancer...

Xtreme AV is pleased to announce the addition of our leading-edge technology, highly concentrated **Optical Enhancer Formulation**... taking the place of the Step 2 Final Rinse.

As good as our previous award winning Liquid Resolution System was...**the addition of our proprietary, anti-static formulated Optical Enhancer takes it to a whole new level... with NO COMPETITON!!!** Expect improved Audio and Video resolution... along with a more natural analog-like presentation on Audio CDs/ SACDs and Video DVDs/Blu-Rays!!!

Please [Click Here](#) to Purchase Liquid Resolution or Learn More...

NOTE: Existing Xtreme AV Liquid Resolution Customers should Call or [Email Us](#) to receive a Customer Loyalty "Discount Coupon Code" to use when purchase the Optical Enhancer and Wipes upgrade. Our Liquid Rez USA user's price is \$20.00 shipped... and \$15.00 plus shipping for our International Liquid Rez users.

**Xtreme AV X-Demag™ CD/LP
Demagnetizer.**

Xtremely Effective on CDs & LPs!!!

**Xtreme AV Liquid Resolution™
CD · SACD · DVD · Blu-Ray
Cleaner & Enhancer**

**NEW & IMPROVED!!!
Our Award Winning
Optical Disc Enhancer
Just got EVEN BETTER!!!**

A Highly Recommended Reference Musical Recording!!!

My [Robert Carranza](#)/[Jack Johnson Experience](#) - Chapter 1

Many of you already know that **I am a Jack Johnson junkie ...** as IMO his **rhythmic, easy listening music and awesome recording quality are unequaled!!!** His new highly successful album titled "[Sleep Through the Static](#)" (over 3 million sold in only eight weeks) was even more amazing... especially with regards to **Robert Carranza's eXceptional analog recording expertise...** even sounding significantly better than his previous very well recorded personal favorite Jack Johnson album "[In Between Dreams](#)".

I purchased this CD off Amazon for \$9.99... and proceeded to write an **Amazon review** with the title "[Phenomenal Recording and Content... and Audiophile MUST HAVE!!!](#)". **BTW:** These two titles are also available on vinyl.

About 4 days later, an interesting thing took place that most audiophiles would surely appreciate...

Additional long story version info...

After coming out of shock and giving him the third degree... then checking my caller ID upon his suggestion... we talked for awhile. It turns out that **Robert is also an audiophile... and had really tried hard to improve the quality of this analog tape performance... and was appreciative that other audiophiles like myself took notice.**

It gets even better... as Robert took the time to drive from Los Angeles to my house for a visit... as I thought to myself how awesome it would be to have this outstanding recording engineer critique my audio system... as he is the "absolute truth" with respect to how my system sounds compared to what he intended. Suffice to say that he gave it very high marks... which made me feel awesome... knowing that I'm moving forward on the right track!!! **He even felt that my Xionic Tourmo Gun prototype added a significant amount of "naturalness" to the musical presentation.**

I definitely feel blessed, humbled and shocked... all at the same time!!! I dream about some day meeting Jack... perhaps sipping on a Pina Colada in Hawaii with him at his house (Not too likely... but I guess I can always dream). I might add that this eXceptional experience couldn't have happened to a more enthusiastic Jack Johnson fan.

Next up... a visit to Robert's Solar Powered Plastic Plant recording studio in LA. Stay tuned... as an update will follow in our next Xtreme Cables/Xtreme AV newsletter.

In the meantime... you should pick up the above TWO well recorded Jack Johnson CDs or LPs... and simply kick back and Enjoy the Music!!!

Xionic Tourmo Gun™ User Testimonials...

*"Hi Brian: Thanks for being first to receive the new Xtreme AV Xionic Tourmo Gun. **This product was an ear opening experience from the very first CD I treated.** From the first note, I heard much more resolution and air between individual vocals and instruments. I tried 5 more CDs with the same outstanding results! **Much more detail retrieval from the disc without any digital glare at all - ALL very analog sounding. The more I listened to the treated CDs, it was as if I was listening to the performance for the very first time! The differences are not subtle.** There was better timing and pace to the music, and the soundstage grew a foot or more in depth from front to back. **I know there is a money back guarantee, but I'm happy to keep the "Gun". I can't listen to my CDs without it! A Five Star WOW factor!!!"***

Randy Nelson · Spooner, WI

Xionic Tourmo Gun™ Developmental History

· longer version ·

A little background about our patent pending Xionic Tourmo Gun™ invention...

I have always been a strong believer in Tourmaline-based Negative Ion treatment for optical discs... as the [Acoustic Revive RIO-5](#) Japanese Tourmaline based Negative Ion Generator convinced me that this was definitely a WOW "must have" product for CD, SACD, DVD-A or Blu-Ray playback. CDs take on sonically detrimental charges when played... or simply when resting in their charged plastic jewel cases. As a dealer for the RIO-5... I have sold many of them... with universal customer acceptance and agreement that the RIO-5 is definitely a WOW "must have" product!!! At the RMAF... I had the pleasure of having Positive Feedback and local LA/OC Audio Society President Bob Levi stop by and evaluate my table top headphone setup.. and he was so impressed with the RIO-5 that he purchased one. I shipped him one when I got home... and in 3 days he wrote this eXceptional [Positive Feedback RIO-5 Review](#)... as he was equally eXcited about his experience. But the RIO-5's relatively expensive price tag of \$595.00 got me thinking... as **I wanted all audiophiles to experience the dramatic improvement in digital (as well as analog) playback that Tourmaline Negative Ion treatment could provide.** So I started thinking... and inventing.

I first came up with an idea and prototypes that involved **Tourmaline-based sleeves that were activated by a hair dryer for both CD and LP playback**... and my Beta Testers were eXstatic. One Beta tester, who I had asked for feedback on both CD and LP treatment, was really excited and shared it with some of his audiophile friends (including Mike Lavigne), who was equally excited about the results on both CDs and LPs. In conversations with this Beta Tester and recognized co-developer, we came up with idea of using Tourmaline Balls inside a hair dryer. **I built the first prototype 3 days later** using the Tourmaline Balls borrowed from my Acoustic Revive RIO-5... and the Xionic Tourmo Gun™ was born. **I then applied for a patent** several weeks later... and our Xionic Tourmo Gun is now patent pending.

Not all Tourmaline-based Ceramic Balls are created equal... as each has its own sonic attributes!!!

For those not familiar with Tourmaline... Tourmaline is a piezoelectric mineral that ionizes the air with the right conditions. It never wears out or needs to be replaced. Some of the Tourmaline based balls we tested produced an extremely clear and detailed sound... but were thin in the mids and yielded a more two-dimensional soundstage. Others were warmer in the mids while possessing a 3-Dimensional soundstage... but lacked the ultimate in detail and clarity. **After extensive testing of 5 different Tourmaline-based ceramic balls... from three different manufacturers... we nailed it!!!** We were able to optimizing clarity and detail... while at the same time provide a warm and tonal balance with rich harmonic over-tones... adding a significant amount of "air" with a huge 3-Dimensional holographic soundstage!!! **This is what R&D is all about** (and I have done this with all of the products I've invented including QuickSilver and QuickSilver GOLD Audio & Video Contact Enhancers; as well as our highly regarded Liquid Resolution Optical Disc Cleaner & Enhancer).

For the XionicTG... we have found an ideal "blend" or mixture of Tourmaline-based Ceramic balls that are eXtremely effective on both CDs and LPs!!! So if you are into either digital playback (CD, SACD, DVD-A, DVD, Blu-Ray) or analog playback... one can simply purchase our patent pending XionicTG CD/LP necessity... and prepare to be amazed!!! It is like hearing your CDs and LPs for the first time!!! And like all of our Xtreme AV products... **our XionicTG is GUARANTEED to PERFORM... and comes with a 30-day money-back guarantee!!!**

So What Does One Hear on CDs??? Let's say on the bigger picture... one hears a more natural, analog sounding, palpable and overall musical presentation. There is less of a digital edge or glare... a bit clearer and detailed... while also providing a slightly warmer analog-like presentation. The soundstage images are more defined in a 3-dimensional, holographic way... with HUGE improvements in air, soundstage depth and front-to-back image layering... helping make your speakers completely disappear!!! **The bottom line... Digital has NEVER sounded so analog!!!** And the great news is that our XionicTG CD/LP is now an eXtremely affordable "WOW" "must have" accessory... what I truly believe is a necessity!!! In fact, **untreated CDs sound relatively unlistenable by comparison!!!**

So What Does One Hear on LPs??? And for vinyl enthusiasts, the improvements in musicality on an already musical format are equally stunning... with more resolution, improved dynamics, a lower noise floor, less clicks and pops, better bass and bass control... and simply an "airier", more palpable, realistic and enjoyable 3-dimensional presentation... helping make your speakers totally disappear!!!

Why this "Gun"??? First and foremost, this Conair Hair Styler is of the highest quality... and is professional grade with an AC motor for enhanced durability... and **carries a 5-year warranty!!!** Secondly, it is affordable... especially when I became a Conair Dealer. The bottom line... **it is a beefy model that is built to last!!!**

IMPORTANT NOTE: If folks believe they can realize the degree of improvements with this hair styler alone... let me share with you that using this device alone will only provide about 10 - 15% of the audio and video improvements that most audiophiles desire (mostly clarity and detail). **The secret to audio nirvana... a dramatic improvement in naturalness and 3-dimensional holographic imaging that the XionicTG provides... lies in our proprietary Japanese Tourmaline Ceramic Ball mixture that is fitted into the diffuser attachment. In fact, one Tourmaline-based ceramic ball component is over THREE TIMES more expensive than similar types of Tourmaline-based ceramic balls.**

You can buy with confidence... as our XionicTG CD/LP will provide many years of musical enjoyment... **for a little over a \$200.00 initial investment!!!**

We strongly believe that our XionicTG is not just another accessory... but an absolute necessity... especially if you're truly interested in "Experiencing the Emotion in Music"!!! The change is not subtle... but rather dramatic... as if you are hearing your musical collection for the very first time!!!

www.XionicTG.com
