Liquid Resolution® CD · SACD · DVD · BLU-RAY Cleaner & Audio/Video Enhancer System

Liquid Resolution is a next generation CD · SACD · DVD · HD-DVD · BLU-RAY Cleaner & Enhancer System that works by thoroughly cleaning, enhancing and removing static from your digital media.

Once the plastic mold release agents, film and haze left in place during the digital medias' manufacturing process are removed... disc read and write errors and error correction are minimized... allowing your optical discs players to function at their full potential.

Liquid Resolution is **GUARANTEED** to enhance your Audio and Video experience...
DRAMATICALLY improving Audio performance and Video picture quality!

Audio Benefits:

- 🕒 Macro & Micro-Detail Resolution
- 🕒 Dynamics & Instrument Weight
- 🕒 Bass Control

-

Liquid Resolution Application Instructions:

1. Wash Hands to minimize finger oil transfer during treatment. **Shake the STEP 1 CLEANER and STEP 2 OPTICAL ENHANCER before each use.**
2. **STEP 1:** Remove the **BLACK CLEANING WIPE** from its container and absorb **TWO PUMPS** of **STEP 1 Cleaner** by **pressing the wipe down on the hands-free dispensing disc creating a wet spot**. Clean the **READ SIDE** of the disc using **LIGHT PRESSURE** in a circular motion from the center to the outer edges of the disc.
3. Treat CD / DVD a **SECOND TIME** using **ONE PUMP** of **STEP 1 Cleaner** pumped into the **same wet spot**. Place the Black microfiber wipe back in its cleaner container to prevent dust accumulation.
4. **STEP 2:** Spray **ONE PUMP** of the **STEP 2 Optical Enhancer (OE)** onto the **READ SIDE** of the disc. Polish dry using light pressure with the **WHITE OPTICAL ENHANCER WIPE**. Treat the LABEL side of the CD/DVD with the residual OE on the wipe. Place wipe back in its OE container after use to prevent dust accumulation. **NOTE: Less is more... use only ONE SPRAY of OE per disc.**

IMPORTANT NOTE: Xtreme AV's Liquid Resolution® CD · SACD · DVD · HD-DVD · BLU-RAY Cleaner & Enhancer System is designed to be used with our optical quality scratch-free microfiber wipes for best results. **Avoid cross contamination of the Cleaner and Optical Enhancer Wipes. Use the BLACK Wipe for the Cleaner... and the WHITE Wipe for the Optical Enhancer.**

Be amazed... and Enjoy the Music and Video!!!
